

TO: CFRT
FROM: Magnus Herrlin, HDDC Chairman
Re: Round Table HDDC Committee

As you may already know, a new CFRT committee was formed at HP on September 5th: the High Density Data Center (HDDC) Committee.

The direction that this committee will take will be discussed at the next HDDC committee meeting.

CFRT and this Committee are unique in that it has an operator and owner focus. However, anyone interested in understanding this environment is welcome to become a committee member and participate in our activities. It should also provide an excellent opportunity for networking.

Please drop me an email if you would like to be a part of this new HDDC Committee. Include your contact information and I will make sure that you will be included on all future mailings. If you already have signed up for the committee, please send me the your complete contact information--thanks.

Due to the holiday season, the next HDDC Committee meeting will take place on January 15, 2004. If you plan to attend the meeting, please let me know so we can plan the event accordingly. The agenda and meeting place will be mailed to all HDDC Committee members.

Lastly, we are looking for candidate Data Centers for a Demonstration Project with LBNL. It could be a new construction or a renovation project. Either way, we are specifically looking for new and innovative ways of reducing the energy consumption of Data Centers. If you know of such a Data Center and you would like to leverage your costs, please contact me at the address below.

Thanks,

Magnus K. Herrlin, Ph.D.
Chair HDDC Committee
