

CRITICAL FACILITIES ROUND TABLE

4th Quarterly Meeting

January 29, 2004

The Main Exchange
365 Main Street, San Francisco

AGENDA

Many thanks to CHRIS DOLAN and 365 Inc. for providing the facilities, refreshments and communications to support this quarterly meeting of the Critical Facilities Round Table.

9:00 AM Welcome and Introduction of Speakers and Attendees
Discuss CFRT Charter and Purpose, present minutes from last quarterly meeting, assess CFRT and Committee progress, present the status of our web site, and request member input for future events and direction.

9:30 AM Review presentations from last quarterly meeting:
"How to Effectively Update Your Critical Facilities", by Peter Gross, EYP Mission Critical Facilities
"Seismic Risks for Data Centers", by David Bonneville, Degenkolb Engineers

10:00 AM **"Data Center Security and Emergency Response"**, by Ed Chandler, CPP, Chairman, Security by Design
Ed Chandler has over 25 years of experience with critical facilities asset protection involving the design of security, fire protection and data center coordination. He is recognized as an expert systems integrator of security alarms, access control, fire detection and suppression, closed-circuit TV, intercom, and emergency shutdown processes for computer facilities. He is a registered CPP via the American Society of Industrial Security, belongs to NFPA, ASIS and ALA, and holds a degree in Physics from UC Berkeley and an advanced degree from Cal State Hayward.

11:00 AM **"Operating, Maintaining and Testing your Critical Facilities"** by Bob Atkins, Principal, EYP Mission Critical Facilities.
Bob Atkins Manages Critical Facilities Assurance for EYP Mission Critical Facilities western region. He is responsible for the delivery of professional services for data center operations, maintenance, testing and commissioning services. He has over 30 years of experience managing and improving the operations of complex facilities for Fortune 500 companies across the country, including about 15 years focused on highly reliable data centers. Mr. Atkins is a certified LEED Commissioning engineer and a member of ASHRAE, IEEE, 7X24 Exchange, AFCOM, BOMA and IFMA.

Noon: Special announcement from PG&E regarding program to assist data center managers improve energy consumption and reduce costs. Patsy Dugger and Bill Dunkle from PG&E's Savings by Design group will provide some details about the program.
Announcements regarding upcoming industry events, noteworthy information from the web, and future CFRT activities. Discuss the how we can have an impact on the Critical Facilities industry.

12:30 PM Optional lunch and tour of the Main Exchange data center with a focus on security, fire protection emergency shutdown systems, as well as the operations of the electrical and mechanical systems ... featuring Hitec rotary UPS systems and fast start diesel generators.
